

Playing Politics

Lyric by: Martin H. Samuel

I know what's going on – you're just playing a game – you're just playing politics

up in the city – out on the street – playing politics – whenever they meet
down at the club – and out on the floor – playing politics – whatever it's for

out on the road – in the back of the car – playing politics – wherever they are
in front of the kids – there is no shame – playing politics – it's the name of the game

everybody's in politics
got their own campaign at their fingertips
everybody's a diplomat
playing politics
tell me where that's at ... playing politics of love

down at the beach – out in the sun – playing politics – whenever it's done
back at the office – who makes a move – playing politics – it's oh so smooth

everybody's in politics
got their own campaign at their fingertips
everybody's a diplomat
playing politics
well tell me where that's at
politics of – politics of love – politics of love – politics *politics* – politics of love

you're in the right place – at the right time
with the right moves – and the right line
you're in the right place – at the right time
with the right moves – and the right line

everybody's in politics
got their own campaign at their fingertips
everybody's a diplomat
playing politics
well tell me where that's at
politics of – politics of love – politics of love – politics *politics* – politics of love
politics of love – politics of love – politics – politics of love

everybody's in politics
got their own campaign at their fingertips
everybody's a diplomat
playing politics
yeah tell me where that's at
politics of love
politics of love – politics politics – politics of love
politics of love – politics of love – politics – politics of love

I know you're playing politics – know you're playing politics – everybody politics
